PROFESSIONAL SUMMARY

Senior Hands-On Engineering Leader with 20+ years of experience designing, building, and scaling enterprise-grade distributed systems across capital markets, banking, and fintech domains. Deep expertise in Java, Spring Ecosystem, Microservices, Event-driven architectures, and Cloud-native platforms. Proven track record of leading high-performing engineering teams while remaining hands-on with system design, performance engineering, and production-grade code delivery. Adept at translating complex business requirements into resilient, observable, and high-throughput technical solutions across the full software development lifecycle.

CORE COMPETENCIES

Languages	Java (Expert), Python, SQL, PL/SQL, JavaScript, TypeScript
Backend	Spring Boot, Spring MVC, Spring Batch, Spring Cloud, Spring Security, Spring Data JPA, Hibernate, REST APIs, GraphQL, gRPC
Frontend	React, Angular, HTML5, CSS3, JavaScript ES6+
Data & Streaming	Apache Kafka, Apache Spark, Apache Storm, Kafka Streams, Spring Kafka, Stream Processing, Batch Processing
Databases	Oracle, PostgreSQL, Snowflake, Couchbase, MongoDB, NoSQL, Redis, Elasticsearch
Cloud & DevOps	AWS (EC2, S3, Lambda, RDS, CloudWatch), Docker, Jenkins, CI/CD, Ansible, Infrastructure as Code
Architecture	Microservices, Event-Driven Architecture, Domain-Driven Design, SOA, Data Mesh, Data Lake, Data Lakehouse, Cloud-Native Architecture, CQRS
Observability	Application Instrumentation, Profiling, Performance Tuning, Monitoring, Logging, Distributed Tracing
Practices	Agile, Scrum, Extreme Programming, DevOps, DataOps, TDD, Code Reviews, Technical Leadership, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Senior Vice President / Principal Backend Developer

Sept 2023 – March 2026

BNY Mellon — Pune, India

- Lead hands-on design and development of an Enterprise Data Lake platform, architecting scalable data ingestion pipelines processing terabytes of financial data daily using Java, Spring Boot, Kafka, and Spark.
- Engineered cloud-native data platform components on Azure with Snowflake integration, driving a large-scale migration of legacy batch workloads to modern stream and batch processing architectures.
- Established performance engineering practices including application instrumentation, JVM profiling, bottleneck analysis, and optimization — reducing P99 latency by 40% on critical data pipelines.
- Drove operational risk mitigation, resiliency patterns (circuit breakers, retry mechanisms, dead-letter queues), and regulatory readiness for enterprise data systems.

- Mentored and led a high-performing engineering team, conducting architecture reviews, enforcing coding standards, and championing engineering excellence through CI/CD, automated testing, and observability.

Associate Director / Senior Development Manager
May 2018 – Sept 2023

CLSA Technology & Services LLP — Pune, India

- Led design and delivery of Cash Equities Middle Office Back Office (MOBO) Data platform, building digital and physical trade confirmation systems for equities post-trade processing using Java, Spring, and microservices.
- Built and managed market data and reference data platforms integrating Refinitiv, Bloomberg, Copp Clark, and real-time FX data feeds, ensuring sub-second data delivery to downstream trading systems.
- Engineered counterparty reference data services and SSI management integrations with DTCC ALERT and DTCC CTM for straight-through processing (STP) enablement.
- Managed cross-functional engineering teams across multiple workstreams, driving Agile transformation and delivery excellence for capital markets technology.
- Built corporate websites, mobile application backends, and digital marketing platform components, delivering full-stack solutions across multiple client projects.

Assistant Vice President / Risk Developer
May 2013 – May 2018

Citicorp Services India Limited — Pune, India

- Designed and built a real-time risk computation platform for FX Options PAA Greeks using Apache Storm, Couchbase, and Spring-based Big Data frameworks, processing millions of risk calculations per second.
- Developed FCC (Futures Clearing and Collateral) and FXLM risk analysis applications using Java, Spring Boot, and Oracle, enabling real-time monitoring and alerting for regulatory risk scenarios.
- Implemented high-throughput event-driven architectures for trade lifecycle events, reducing risk computation latency from minutes to milliseconds.
- Collaborated with quantitative analysts and risk managers to translate complex financial models into production-grade Java services deployed across distributed compute clusters.

Senior Software Engineer
Sept 2011 – April 2013

Loylogic Technologies India — Pune, India

- Developed PointsPay — a SOA-based loyalty reward redemption and payment platform using Java, Spring Batch, and RESTful web services, enabling seamless points-to-payment conversion for global airline loyalty programs.
- Designed batch processing workflows for high-volume transaction reconciliation and settlement, handling millions of loyalty transactions monthly.

Senior Software Engineer
June 2010 – August 2011

SecurView Systems — Pune, India

- Engineered CASPER — a multi-tenant SaaS platform for security information and event management (SIEM), developing core Java modules for log aggregation, threat correlation, and real-time alerting.
- Engineered scalable managed services infrastructure supporting multi-client deployments with tenant isolation and configurable security policies.

Associate Consultant
June 2007 – May 2010

Oracle Financial Services Software Limited — Pune, India

- Developed modules for Oracle Flexcube Private Banking — an enterprise wealth management platform supporting customer onboarding, portfolio management, and transaction processing using Java, J2EE, Spring Batch and Oracle.

- Built and optimized PL/SQL stored procedures and complex reporting queries for high-volume banking transaction datasets.
- ISO-8583 messaging integration with real time payment processing with core banking application.

Java Developer Jan 2006 – May 2007

Agilisys IT Services India Private Limited — Mumbai, India

- Developed portals for Shopping.com partner website — an e-commerce comparison shopping platform — Based on Java, Servlets and JSP with Oracle database integration.

KEY ACHIEVEMENTS

- Architected enterprise-scale Data Lake and domain-driven Data Mesh platforms processing petabytes of financial data on Snowflake and Big Data ecosystems with strong operational risk and regulatory readiness.
- Delivered real-time risk systems using Apache Storm, Couchbase, and Spring — computing FX Options PAA Greeks in real time for one of the world's largest financial institutions.
- Led cloud transformation initiatives migrating mission-critical business processes to AWS, reducing infrastructure cost by 35% and improving system availability to 99.95%.
- Built end-to-end post-trade systems for Cash Equities and OTC Derivatives, integrating DTCC CTM, DTCC ALERT, and multi-currency clearing and payment platforms.
- Established performance engineering culture — instrumenting applications, profiling JVM, identifying bottlenecks, and achieving measurable latency reductions across critical trading platforms.
- Designed and delivered multi-tenant SaaS platforms, SOA-based enterprise solutions, and private banking systems serving thousands of users globally.

EDUCATION

Bachelor of Engineering in Computer 2005
